

Dyker Beach Golf Course

Brooklyn, NY

As part of the new Junior Golf Center at the Dyker Beach Golf Course located in Brooklyn, NY, a significant amount of new turf and shrubs were established around the newly renovated clubhouse.

Superintendent, Todd Zook specified two different soils that he wanted for lawn versus where shrubs would be installed. Both soils have to be well-draining, but the organic matter content had to be lower for the lawn areas (4-6%) and higher for the shrub plantings (5-8%).

Agresource made the soils to specification and carefully managed the deliveries so that landscape crews used the appropriate soil type for each application.
